MICRO-FIBER

Available in various weights and sizes Stellar's all purpose microfiber towel is just that. Good for anything from polishing and waxing to picking up everyday dust around the house. This towel is perfect for any and every job.

MOP + TOOL

Available in various sizes and colors, we can even customize to fit your unique mopping system. As with all of our microfiber products our mop pads make your floor-care much easier. Great on fine finishes they even work great as applicators as well.

NON-WOVEN

Our line of non-woven microber is ideal for any application. Although it is a disposable, it can be laundered numerous times. For simple care just rinse, wring out, hang dry and it will be ready to use again in no time.

KEY BENEFITS

MIMA Towel Delivers the finest quality Micr-Fiber Products Available. All products share these key benefits:

Non-Abrasive

Outside of just superior cleaning capabilities microfiber is also non-abrasive. With most cleaning materials the dirt particles you are wiping up will remain on the outside of the fiber and will readedly be wiped over the surface again and again. This will cause scratches on the surface and may seriously damage delicate finishes. With microfiber the particles get trapped inside the fiber therefore the soft material you feel is the only thing wiping the surface.

Durability

If all of the other features and benefits are not enough microfiber is going to greatly outlast other cleaning materials as it relates to your application. It is easy to care for; it is constructed to be free-rinsing so either quickly rinsing out in a sink or machine washing with a mild detergent will bring your microfiber back to new. (dry with low or no heat).

Custom Orders

Give us your vision and we'll give you extreme manufacturing capabilities.

- # of pics
- Different weaves or patterns are no problem
- Various sizes and weights
- Print your Comapny logo

Industries

MIMA products excell in the following industries:

- Car Care
- Foodservice
- Healthcare
- Homegoods
- Hospitality
- Janitorial

Why Micro Fiber?

Micro fiber cleaning products make life easier. The Stellar microfiber consist of 70%polyester and 30% polyamide of 2 denier which is then split into 0.2 denier. What does this mean? You wind up with a product that will cover an expansive surface area. 1gram of Stellar microfiber is equal to 45,000 meters of thread.

These microfibers attract dust, dirt, grime, and liquids like a magnet. As the fibers move across the surface, the gaps between the microfilaments scoop up or "hook" the particles capturing them between the splits in the microfiber. Instead of the particles sticking outside the fiber, as is typical with most cleaning materials, the particles are sucked up inside the fibers.

Microfiber cleans with or without the use of chemicals. Certain jobs will always require the use of chemicals, many of your jobs will no longer though. With just the use of water microfiber is able to grab onto or "hook" built in grime.

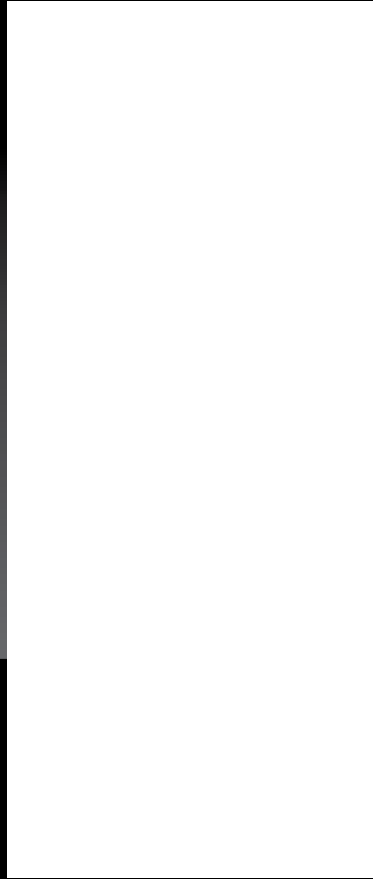

Many cleaning products just push dirt around. They pick up dirt then the dirt rubs right back onto the surface. These products will eventually get the surface clean but it may take repeated wipes and very often some of the dirt particles are left behind.
