

WHAT MAKES MIMA TOWEL & SUPPLY DIFFERENT?

THE FINEST FIBER TECHNOLOGY

MIMA kicks it up a notch when it comes to microfiber.

We have partnered with a world-wide manufacturer with the ability to produce the finest diameter available in microfiber (.2 denier). The finer the fiber, the greater the absorbency and ability to trap and hold microscopic fibers, dirt, and bacteria.

ANTI-MICROBIAL MICROFIBER

MIMA is on the cutting edge of anti-microbial microfiber with WIPE OUT ONE.

Other anti-microbial microfiber treatments rely upon a chemical reaction. Our process is a physical reaction proven to deliver 99.99% kill on single cell organisms.

THE GREENEST MICROFIBER

MIMA provides the most environmentally preferred microfiber product.

MIMA microfiber enables you to save on chemicals, water, and energy usage. Since our microfiber is extremely durable, it holds up to over 500 washes.
